## **LETTER BY POST, FAX AND EMAIL**

Dear Sirs

**Re: Permitted Development Rights for Microgeneration Development**

**Our Client : Belfast International Airport**

We refer to the above and your consultation paper published in October 2009.

Our client has read the content therein and noted your comments in relation to Wind Turbines and their potential impacts relating to noise and aircraft safety.

However, we write on behalf of our client to re-affirm our client's objection to such microgeneration permitted development rights being afforded when the Planning Service has not yet fully investigated the potentially significant impacts such permitted development rights would have on the safe operation of the airport.

Our client would be open to discuss the potential impacts of microgeneration permitted development rights with Planning Service should you would find that helpful in relation to your own investigations.

Yours faithfully

  
**Carson McDowell**
